10 This invention relates to a picture frame assembly comprising (a) a frame panel comprising a sustained release fragrance material; (b) a picture panel comprising an adsorbent panel coated with a fragranced polymeric emulsion; (c) a support panel comprising a fiber board coated with a fragrance oil; and (d) an impervious backing panel. This invention also relates to an air filtration device comprising (a) a frame panel; (b) a porous
15 filtration medium disposed within the frame panel; and (c) an adsorbent panel disposed on the porous filtration medium. A sustained release fragrance material is disposed on a first portion of the adsorbent panel and a fragrance oil is disposed on a second portion of the adsorbent panel.
